II. Nhận xét

Các hướng làm bài chính:

- Chia các phần tử vào các mảng (mảng dương, mảng âm, mảng 0), sau đó thao tác trên các mảng.
- Xét từng phần tử trong mảng, tính tích tại mỗi lần xét: Nhóm 9, Nhóm 4, Nhóm 2
- Nhóm 4 đặc biệt, có biến allZero, và cần sắp xếp mảng
- Nhóm 6 có cách giải khác
